ADVANCED TECHNOLOGY

Microneedling (Collagen Induction Therapy)- \$250

Treats scars, wrinkles and large pores for smoother, firmer, more toned skin. Less aggressive than laser treatments but greater impact than microdermabrasion and peels.

IPL (Intense Pulsed Light) Photofacial

Laser technology targets hyperpigmentation and vascularity with a pulsed broadband light producing more even skin tone.

Pixel (Fractional) Laser

This resurfacing laser creates tiny thermal channels which rebuilds collagen and smooths fine lines and wrinkles.

Ultherapy

Ultrasound technology reaches deeper connective tissue to lift sagging jawline, upper face, brow line, neck or décolleté.

TLC

Our ultimate anti-aging offering combines three technologies in nine treatments dramatically improving texture with Pixel Laser; lifting sagging tissue with Ultherapy and correcting color imperfections with IPL.

Consultations are free and required for laser & ultherapy pricing. Ask your clinician about packages and specials!
